a button that leads to the iRCT Page

About Learning Causal Networks from Data

Text placeholder, we will compose and enter the proper text here later

Go to Causal Learning Package

a button that leads to the CausalLearning Page

Welcome to iRCT's webpage!

Please note the following before uploading a file:

- All data in the file must be numerical.
- The currently accepted file formats are: txt, csv, xlsx, and dat
- NOTE: using certain functions on your dataset might cause errors or not work.
- NOTE: The functions other than the most up-to-date might take multiple minutes to run.

No file chosen

Please specify the delimiter for your dataset here:

colon ▼

Please sepcify the function you would like to use:

Most up-to-date Function (Multiple covariates, fastest) ▼

UPLOAD

Note that we should add MBIL-java as the first method here. The DID methods follows.

Welcome to the Causal Learning webpage!

Please note the following before uploading a file:

- All data in the file must be numerical.
- The currently accepted file formats are: txt, csv, xlsx, and dat

Note that we
can allow non-
numerical data
